Bored&Broke

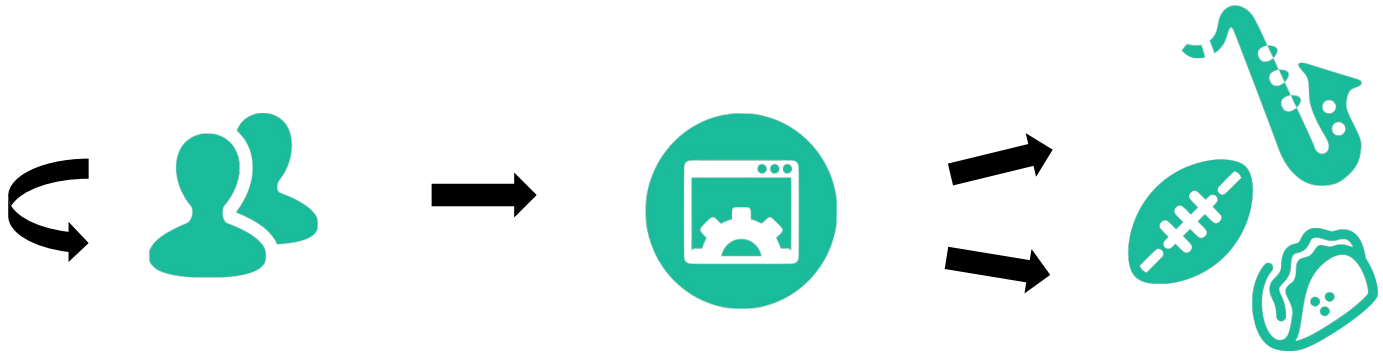
our idea



users

Bored&Broke

activities

Bored&Broke

project goals

provide users with activities that are within their budget

give users the opportunity to meet new people in their area

connect users based on common interests (not likes or photos)

Bored&Broke

why we did this

- relevant in our lives as we are about to graduate and move to new places
- uses skills we already have from previous courses and internships
- allowed us to (for the first time) create an entire product from nothing
- “humanistic vision of intellectual inquiry as well as the cultivation of particular skills”
